TECHNICAL SUMMARY

Java Backend Engineer with 5+ years of experience designing and maintaining microservices for enterprise platforms in the insurance and healthcare domains. Proficient in Java, Spring Boot, REST APIs, with hands-on exposure to CI/CD automation using GitHub Actions and containerization with Docker. Additionally experienced in frontend development using TypeScript, React, and Lit Web Components, supporting full delivery across the stack. Focused on building reliable, scalable backend systems in high-compliance environments.

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions Associate

January 2025 – Present
Pune

- Developed and maintained backend microservices in Java and Spring Boot for a general insurance platform, handling content for user and policy data
- Migrated legacy CI/CD pipelines to GitHub Actions, reducing deployment time by ~ 25% and improving build reliability across multiple services
- Implemented monitoring and observability using Datadog, and centralized logging using Splunk, enabling proactive issue detection across services
- Managed AWS infrastructure through AWS CDK, provisioning and deploying cloud resources across multiple regions to support scalability and regional availability, while maintaining consistent, version-controlled infrastructure-as-code definitions across environments
- Worked in an Agile environment across sprint planning, code reviews, and release cycles, collaborating with cross-functional teams to deliver features on schedule

Cognizant Technology Solutions Associate

December 2020 – December 2024
Hyderabad

- Maintained backend APIs in Java to support content delivery across 3 regional healthcare websites, integrating with frontend interfaces for structured content consumption
- Built and managed Java-based content workflows on the CMS server, triggered automatically on content creation and publish events, reducing deployment turnaround time by ~ 35% across web properties
- Designed content rendering templates using XSLT, XML, and JSON within the CMS platform, enabling dynamic page assembly from backend content structures
- Led the end-to-end migration of 40+ legacy UI components to Lit Web Components, improving reusability and maintainability across the platform as the frontend tech lead within a 4-member team

EDUCATION

R. C. Patel Institute of Technology

Bachelor of Computer Engineering, Shirpur, Maharashtra
CGPA: 8.10

August 2017 – September 2020

Government Polytechnic

Diploma in Computer Engineering, Jalgaon, Maharashtra
Percentage: 74.06

August 2014 – May 2017

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, HTML, CSS

Frameworks: Spring Boot, Spring MVC, Spring JPA, React, Lit Web Components

Backend: REST APIs, Microservices

Databases: MySQL

DevOps: Docker, GitHub Actions, CI/CD, Datadog, Splunk

Tools: Git, Github Copilot, JIRA, Confluence, Postman, VS Code, IntelliJ Idea
